

## Quick Start Setup Instructions for AgLeader ISO Liquid Rate Controller

**PLEASE NOTE:** Your setup may vary. Not all screens are shown.  
See AgLeader's Operator's Manual for safety information  
and additional setup/operating information.

### MENU STRUCTURE FOR LIQUID RATE CONTROLLER

#### Main Screen

- Overview
- Target/Actual Rates
- MPH

#### Settings

- Manage Components
- Control Valve
- Alarm
- System

#### Calibration

- Pressure
- Flow
- Pump
- Speed

#### Diagnostics

- Module
- Alarms
- Unlocks

### System Information

AgLeader technology is a very flexible control plat-form with many capabilities. This quick start setup guide will show you the necessary steps to setup your display to control AgXcel's Fertilizer Pump Systems. Follow the general directions in your AgLeader ISO User Manual (especially under Configuration and Liquid Rate Control). This manual will show you the specific num-bers and settings to use with your AgXcel Fertilizer Pump System.

### Integra & InSight Users

Information in this manual is applicable to the ISO version through the monitor's Virtual Terminal, except for screen-shots shown in the **Setup & Operation**. The **Calibration** and **Setup** values in this section **DO** apply to the Integra and InSight. However, the Integra and InSight has a completely different screen layout and menu structure that is not shown in this manual. Use your AgLeader manual to navigate, then enter the appropriate numbers from the AgXcel manual.

### Virtual Terminal (VT) -

When your Agleader ISO Liquid Rate Controller is correctly connected, It will be discoverable in your monitor's Virtual Terminal section. Select the Virtual Terminal icon, which in this case is displayed on the bottom as "VT"

- From the "Home" screen, press the "VT" icon on the bottom of the screen, which will take you to the **Virtual Terminal** screen.
- Once on the **Virtual Terminal** screen, your AgLeader ISO module will be detected. Once detected, it will load your current configurations. If this is your first time setting up, it will display a message letting you know that system has not been configured.

# Quick Start Setup Instructions for AgLeader ISO Liquid Rate Controller

## System Configuration -

System configuration is where you will set the AgLeader ISO to be compatible with the AgXcel fertilizer system components. In this section of the setup, this is where you will configure the AgLeader ISOLiquid Rate Controller to manage the AgXcel fertilizer system.

### Configure Equipment -

1. System Type: Liquid Fertilizer
2. Equipment Type: User Defined
3. Boom/Toolbar Position: User Defined

System A Configuration:  
Configure Equipment

System Type:  
Liquid Fertilizer

Equipment Type:  
Towed

Boom/Toolbar Position:  
Rear Mount

### Hardware Detection -

This screen will display the successfully connected modules. You will see your liquid module(s) and your swath module if you have them available.

System A Configuration:  
Hardware Detection

Liquid 1: 2150010995  
Swath: 2140010863  
8 Sections

### Section Valves (If Swath Module is Connected)

The Section Valve screen will only display if you have the AgLeader ISO swath module correctly connected.

1. Signal Type: 12v Signal
2. Section Valve Type: Standard

System A Configuration:  
Section Valves

Signal Type:  
12V Signal

Section Valve Type:  
Standard

### Section Overview -

AgLeader ISO will detect how many section shutoff valves that are connected to the swath module harness. Depending on the amount of sections that are connected will be listed in the Section Overview.

System A Configuration:  
Section Overview

Swath: 2140010863

1:	12V Signal, Pin(s) 1
2:	12V Signal, Pin(s) 2
3:	12V Signal, Pin(s) 3
4:	12V Signal, Pin(s) 4
5:	12V Signal, Pin(s) 5
6:	12V Signal, Pin(s) 6
7:	12V Signal, Pin(s) 7
8:	12V Signal, Pin(s) 8

# Quick Start Setup Instructions for AgLeader ISO Liquid Rate Controller

Swath Configuration: 2140010863

Pin	Signal Type	Section
1	12V Signal	1
2	12V Signal	2
3	12V Signal	3
4	12V Signal	4
5	12V Signal	5
6	12V Signal	6
7	12V Signal	7
8	12V Signal	8
9	Not Used	
10	Not Used	
11	Not Used	
12	Not Used	

Signal Type: 12V Signal

Section Name: 1

## Swath Configuration -

Swath Configuration will allow you to name each section and assign the signal type to them.

1. **Signal Type:** 12v Signal
2. **Section Name:** User Defined

Profile Configuration:

Profile Name

AgXcel

## Profile Configuration - Profile Name

This will section of the configuration will allow you to create a profile that will save the configurations set to that profile that is being created. AgLeader ISO can have up to 4 stored profiles on its system.

Profile Configuration:

Nozzle Spacing

30.0 in

## Nozzle Spacing -

This is the measurement between each nozzle or row on your toolbar. This will be measured in inches.

Profile Configuration:

Section	Nozzles	Width
1	1	30.0
2	1	30.0
3	1	30.0
4	1	30.0
5	1	30.0
6	1	30.0
7	1	30.0
8	1	30.0

Totals

240.0 in

8 Nozzles

## Nozzle Assignment (Sections) -

If you do have the AgLeader ISO Swath Module then you will be able to assign how many rows are in each section for the setup that you have.

Profile Configuration:

Enable Direct Injection Communication

☐

## Direct Injection Communication -

Enable this if you are using direct injection setup.

# Quick Start Setup Instructions for AgLeader ISO Liquid Rate Controller

## Channel Configuration - Channel Name and Capacity

On the channel configuration screen, AgLeader will allow you to name the tank and capacity that you are using with the AgXcel's pump system.

## Rate Control Settings -

Rate controller settings is where you will set the AgLeader to be compatible with the AgXcel fertilizer system components.

**Control Valve Configuration:** PWM 12V

**Feedback Type:** Flow Meter

**Use Pressure Fall-back:** Enable this setting to allow AgLeader to lock into your target rate by using pressure readings as a fall-back\*

\*When using optional Pressure Transducer Kit P/N 53491

## Rate Off Settings -

Aux Valve 1 Behavior: Closed

Aux Valve 2 Behavior: Closed

Control Valve Behavior: Closed

Channel Configuration: Tank 2150010995

Channel Name and Capacity

Name: Tank

Capacity: 500.0 gal

Channel Configuration: Tank 2150010995

Rate Off Settings

Aux Valve 1 Behavior: Closed

Aux Valve 2 Behavior: Closed

Control Valve Behavior: Close

Channel Configuration: Tank 2150010995

Rate Control Settings

Control Valve Configuration: PWM 12V

Feedback Type: Flow Meter

Use Pressure Fallback: ☐

## Profile Configuration - Task Controller GPS Offsets

Enter the GPS offsets for the setup.

Profile Configuration: Task Controller GPS Offsets

a 0.0 in

b 0.0 in

c 0.0 in

Right

Once the profile has been completed, a notice will pop up stating that the set up is complete and that the sensors will need to be calibrated

Profile Configuration:

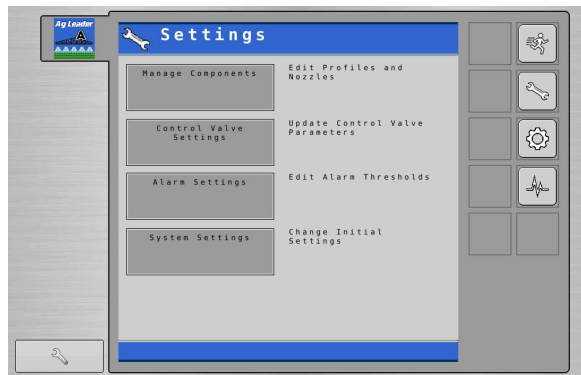

You have completed the profile setup. Sensors must be calibrated prior to use.

# Quick Start Setup Instructions for AgLeader ISO Liquid Rate Controller

## AgLeader ISO Settings Structure

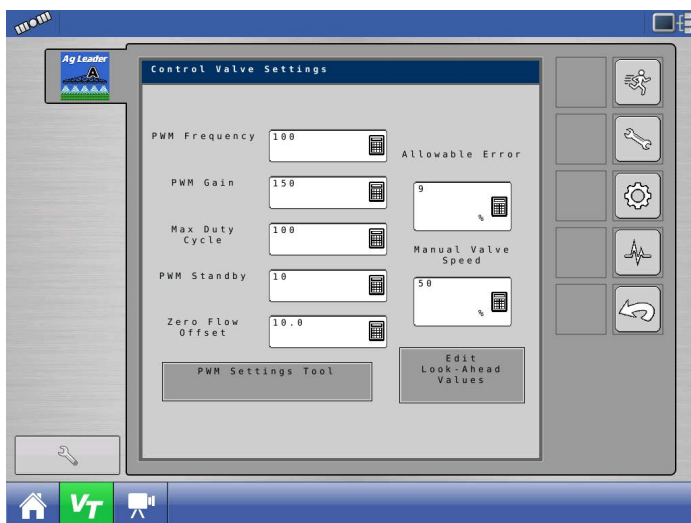

- **Manage Components** - Edit Profiles and Nozzles
- **Control Valve** - Update Control Valve Parameters
- **Alarm** - Edit Alarm Thresholds
- **System** - Change Initial Settings

### Settings - Manage Components

In the Manage Component menu, you will be able to add, edit, or remove profiles for your AgLeader ISO. You can store up to 4 profiles on the AgLeader. Selecting the Nozzle tab will also allow you to do the same for the nozzle profiles.

### Settings - Control Valve Setting

#### PWM Frequency:

All Systems..... 100

#### PWM Gain:

GX5 (hydraulic).... 800  
GX2 (electric)..... 9900  
Synergist..... 9900  
GX12HP.....150

#### Max Duty Cycle:

All Systems..... 100

#### PWM Standby:

GX5 (hydraulic)..... 30  
GX2 (electric)..... 10  
Synergist..... 10  
GX12HP.....10

#### Zero Offset:

GX5(hydraulic)..... 30  
GX2 (electric)..... 5  
Synergist..... 5  
GX12HP.....10

#### Allowable Error:

All Systems..... 2%

#### Manual Valve Speed:

All Systems..... 100%

Zero Flow Offset is Low PWM Limit  
Lower this setting if pump will not go low enough. Raise this to get to the rate quicker on startup.

## Look-Ahead Settings

Turn-On Look-Ahead: 0.9 s  
Turn-Off Look-Ahead: 0.5 s  
Rate Change Look-Ahead: 0.0 s  
Flow Control Delay: 0.0 s  
Disable Sections On/Off Delays: Unchecked

## AgLeader ISO Calibration Structure

- Pressure Sensor Calibration
- Flow Sensor Calibration
- Pump Sensor Calibration
- Speed Sensor

## Calibration - Pressure Sensor

Sensor: Main Selected

Main: Voltage

Calibration Method:  
Single Set Point

Pressure Sensor Calibration  
Number:  
50 mv/psi

# Quick Start Setup Instructions for AgLeader ISO Liquid Rate Controller

## Calibration - Flow Sensor

Calibration Method: Manual Calibration

### AgXcel's Flow Meter Chart

Number of Pumps	Flow Calibration Number
1 Pump	84
2 Pumps	42
3 Pumps	28
4 Pumps	21

Please refer to your Serial Number system guide to see your flow calibration number.

## Calibration - Pump Sensor

Check your pump's sensor pulses/rev calibration number. If you do not have one then disable the pump's sensor feature.

## Calibration - Speed Sensor

Check your speed sensor pulses/100ft calibration number. If unable to find then run the calibration that you see in the above screenshots.

# Quick Start Setup Instructions for AgLeader ISO Liquid Rate Controller

## Run Screen Settings

Press on the boxes on the main Run Screen to:

- Enter a Manual Speed
- Set up Target Rate 1 and Target Rate 2
- Turn on Rate Smoothing
- Set the amount of liquid in the Tank
- Set up the Pressure Dial

The main Run Screen displays the following information:

- Top left: Ag Leader logo
- Top center: lbs/gal 9.400
- Top right: gal/ac 7.00 (Target Rate 1)
- Middle left: Manual speed 5.0 mph
- Middle right: gal/ac 7.00 (Target Rate 2)
- Bottom left: Pressure gauge showing 11.7 psi
- Bottom center: AgXcel GX2 Demo Tank with 488 gal
- Bottom right: Agitate 0 psi, Aux 0 psi, 429496 rpm

Red arrows indicate the setup sequence:

- From the Manual speed box (5.0 mph) to the Speed Source Settings screen.
- From the Target Rate 1 box (7.00 gal/ac) to the Rate Control Settings screen.
- From the Target Rate 2 box (7.00 gal/ac) to the Rate Control Settings screen.
- From the Pressure gauge (11.7 psi) to the Pressure Settings screen.
- From the Tank (488 gal) to the Container Settings screen.
- From the Use Rate Smoothing? checkbox to the Actual Rate Settings screen.

**Speed Source Settings**

- Speed Source: ISO GBS0
- Manual Override: ☐ 5.0 mph

**Rate Control Settings**

- Target 1: 5.00 gal/ac
- Target 2: 7.00 gal/ac
- Increment: 1.00 gal/ac

**Actual Rate Settings**

- Use Rate Smoothing? ☐

**Pressure Settings**

- Max Graph Pressure: 100 psi
- Prime/Standby Pressure: 0

**Container Settings**

- Tank: 486 gal
- Controls: Up, ?, Down
